Re: Renewal of Conditional Use Permit 97-03

Dear Ms. Doan,

Signal Hill Petroleum, Inc. ("SHP") is requesting the renewal of City of Signal Hill ("City") Conditional Use Permit 97-03, ("CUP 97-03") last approved for a one-year term in May of 2019. SHP appreciates City staff's rigorous review of SHP's performance and compliance under this permit over the last year and their recommendation for approval of a renewal of CUP 97-03 for the coming year.

SHP has operated its oil and gas operations in compliance with a myriad of regulations including the terms of CUP 97-03 for many decades. During this time, SHP has safely and cleanly extracted millions of barrels of crude oil while investing in technology, emissions reduction equipment, and drilling new wells to access the significant oil reserves remaining within the Signal Hill/Long Beach Oilfield. This local oil production is not only secure energy for California, but also supports living wage/full benefit jobs and pays millions of dollars in taxes in fees that help support the community.

SHP, as the major land owner and developer within the City, looks forward to continuing to work with the City to move forward development on several major project sites with the goals of bringing to the community new hospitality, dining and shopping amenities, new market and affordable housing and also adding new revenue sources for the City.

Regards,

David L. Slater
Executive Vice President/COO
Signal Hill Petroleum, Inc.
